Application Serial No.: 10/583,028 Attorney Docket No.: 0756-7743

ABSTRACT

It is an object of the present invention to provide a material which is excellent in a hole injecting property and a hole transporting property, and to provide a light emitting element and a light emitting device using a material which is excellent in a hole injecting property and a hole transporting property. The present invention provides a earbazol carbazole derivative represented by a general formula (1). The earbazol carbazole derivative according to the present invention is excellent in the hole injecting property. By using the earbazol carbazole derivative according to the present invention as a hole injecting material for a hole injecting layer of a light emitting element, a driving voltage can be reduced. In addition, a lower driving voltage, improvement of the luminous efficiency, a longer life time, and higher reliability can be realized by applying the material to a light emitting element or a light emitting device.
